SUMMARY

A passionate and motivated Computer Science and Engineering student with a strong interest in technology, software development, and emerging innovations. Known for a positive learning attitude, adaptability, and strong problem-solving abilities. Highly motivated to develop practical solutions that address real-world challenges and create meaningful impact. Enthusiastic about continuous learning and technological advancements, with a keen interest in gaining practical experience and contributing effectively in a dynamic and collaborative environment.

EDUCATION

Bachelor of Engineering - Computer Science & Engineering 2023-Present CGPA:8.49
Mangalore Institute of Technology & Engineering

Senior Secondary (12th) – Department of Pre-University Education 2021-2023 Percentage:94%
Poornaprajna PU College Admar

Secondary School (SSLC) – Karnataka Secondary Education Examination Board 2018-2021 Percentage:91.04%
Poornaprajna English Medium Highschool Admar

SKILLS

Languages : C, Python, Java.
Interface : HTML, CSS.
Databases : SQL, MySQL, MongoDB.
Tools : Git, Visual Studio Code, MS Office, Microsoft Excel.
Technologies : Web Development.

INTERNSHIP

InternPe | Python Programming Intern October 2024 – November 2024
Project: Python Utility Toolkit
Technologies: Python, OOP, Tkinter, File Handling, PyCharm , Git, GitHub
Gained hands-on experience in Python programming concepts including data structures, file handling, and OOP.

PROJECTS

SafeStream – Real-Time Edge AI for Live Video Anonymization | Group of 4 *January 2026 – Present*
Technologies: Python, Kotlin, TensorFlow Lite, OpenCV, YOLOv8, RTMPS
Developing a privacy-preserving real-time video processing system using edge AI to detect faces in live video and selectively anonymize them. The system identifies and preserves the streamer's face while automatically blurring other detected faces to protect their privacy. It uses lightweight machine learning models with TensorFlow Lite for efficient on-device inference and OpenCV for real-time video processing with minimal system resource requirements.

Bank Management System | DBMS Project *August 2025 – November 2025*
Technologies: Python, MySQL, SQL, HTML, CSS, Javascript.
Developed a database-driven banking system to manage customer accounts, transactions, and account details efficiently. Implemented functionalities like account creation, deposit, withdrawal, and balance inquiry. Ensured data consistency and integrity using structured queries and relational database design.

CERTIFICATIONS

- Certified in the course **'Data Mining'** in 2026 by NPTEL.
- Certified in the course **'Networking Basics'** in 2026 by CISCO.
- Certified **'Agentblazer Champion'** - Salesforce, 2026.
- Certified in the course **'Front-end Web Development'** in 2025 by Reliance Foundation.
- Certified in the course **'Introduction to Generative AI'** in 2025 by Google Cloud.
- Certified in the course **'RPA Developer Foundation'** in 2025 by UiPath Academy.
- Certified in the course **'Cyber Job Simulation'** in 2025 by Deloitte.
- Certified in the course **'Java Programming Fundamentals'** in 2025 by Infosys.

ACHIEVEMENTS & ACTIVITIES

- Participated in workshop on Cyber Security: Vulnerability Assessment and Exploitation, 2025
- Participated in Hack and Seek Hackathon, 2025
- Participated in workshop on Building AI/ML Foundation with Python, May 2025
- Participated in NAIN Hackathon, September 2024
- 3rd Place, Navarasa, NMAMIT inter-college fest (2024)
